## EDUCATION

|  |                                      |
|--|--------------------------------------|
| <b>BNM institute of technology</b><br><i>Bachelor of Engineering in Computer Science</i> | Bengaluru, KA<br>2017 - 2021, 8 CGPA |
| <b>Sri Viveka Vidyalaya</b><br><i>Intermediate</i>                                       | Mysore, KA<br>2015 - 2017, 85%       |

## RELATED EXPERIENCE

|   |                                     |
|---|-------------------------------------|
| <b>Carelon Global Solutions</b><br><i>Front End</i> | Sep 2021 – Present<br>Bengaluru, KA |
|---|-------------------------------------|

- Engaged in the visionary overhaul of an AskQ enterprise-level portal, I oversaw the entire process of website design, development, and testing. This platform empowers users to express concerns and provide feedback regarding websites and products.
- Led an exhaustive product development cycle for the E2E project, systematically identifying and addressing issues, culminating in a noteworthy \$2.78 million reduction in manual labor costs for the year 2023. Employed advanced technologies such as React.js, Redux, and Java to elevate and optimize the overall development process.
- Strategically orchestrated collaboration within the SCRUM team, leading the creation of a customized Jira tool using React.js and Javascript. This innovation facilitating the effortless generation of Jira tasks and also resulted in a remarkable 50% reduction in workload for the SCRUM masters.

- Back End*
- Designed and developed a resilient REST API to retrieve information from the Blue Square Management System APIs. This strategic initiative significantly improved data access and management, contributing to an overall enhancement in operational efficiency.
  - Innovated by designing and implementing bots tailored for enterprise applications, spanning diverse platforms such as Desktop, Web, and Mainframe, leveraging JavaScript and React to enhance operational efficiency and user engagement.

|   |                                       |
|---|---------------------------------------|
| <b>WebileApps Private Limited</b><br><i>Software developer Intern</i> | Jan. 2021 – Feb 2021<br>Bengaluru, KA |
|---|---------------------------------------|

- Worked on web development initiatives, emphasizing proficiency in front-end technologies, including cutting-edge frameworks and languages.
- Collaborated closely with the UI/UX team to comprehend project requirements, ensuring seamless integration of design elements.

## PERSONAL PROJECTS

- Netflix GPT / React.JS, Redux, Javascript, Tailwind CSS, HTML**
- Initiated the creation of a Netflix clone with GPT-3 integration, exploring the project's beginnings and setting the stage for an enhanced user experience.
  - Implemented features allowing users to explore popular, upcoming, and latest movies, utilizing the TMDB API.
  - Ensured secure user data storage and authentication through Firebase, enhancing the overall reliability of the NetflixGPT project.

- Plant Disease Detection / React.JS, Javascript, HTML, CSS, ML**
- Conceived and executed a plant disease detection solution for my final year project.
  - Created an intuitive interface where users can submit photos of diseased plants, implementing algorithms to precisely identify the specific plant disease in the images.

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, C#, SQL, HTML/CSS  
**Frameworks:** Spring Boot, React.JS, Redux, RTK, Material UI, Tailwind CSS, Hibernate  
**Developer Tools:** Jira, Git, VS Code, Parcel, Visual Studio, Postman  
**Data Structure & Algorithm**

## CERTIFICATIONS

Spring Boot / React / Java Programming / MERN Stack / Front-End Web UI frameworks
